LITHOS

Contents Volume 33, (1994)

Preface 1
Exhumation of deep crustal metamorphic rocks and crustal extension in arc and back-arc regions
L. Jolivet, J.M. Daniel, C. Truffert and B. Goffé 3
Prograde and anatectic reactions in the deep arc crust exposed in the Hidaka metamorphic belt, Hokkaido, Japan
M. Komatsu, T. Toyoshima, Y. Osanai and M. Arai 31
The Ryoke plutonometamorphic belt: crustal section of the Cretaceous Eurasian continental margin
T. Nakajima 51
An inverted metamorphic field gradient in the central Brooks Range, Alaska and implications for exhumation of high-pressure/low-temperature metamorphic rocks
B. Patrick, A.B. Till and W.S. Dinklage 67
Geodynamic setting of volcano-plutonic rocks in so-called "paleo-accretionary prisms": Fore-arc activity or post-collisional magmatism? The Shimanto belt as a case study
G. Stein, J. Charvet, H. Lapierre and O. Fabbri 85
Subducted and obducted ophiolites of the Central Alps: Paleotectonic implications deduced by their distribution and metamorphic overprint
R. Oberhänsli 109
Evolution of the Sambagawa metamorphic belt, Japan
A. Takasu, S.R. Wallis, S. Banno and R.D. Dallmeyer 119
Turbidite geochemistry and evolution of the Izu–Bonin arc and continents
J.B. Gill, R.N. Hiscott and Ph. Vidal 135
Destructive plate margin magmatism: Geochemistry and melt generation
C.J. Hawkesworth, K. Gallagher, J.M. Hergt and F. McDermott 169
Aspects of magma genesis in arcs
R.J. Arculus 189
Genesis of continental crust under island arc conditions
T. Yanagi and K. Yamashita 209

Recrystallization of quartzofeldspathic rocks in a Paleozoic thrust belt, Grand Lake, Newfoundland: implications for garnet–biotite thermometry
J.V. Owen and J.D. Greenough 225
The Asama igneous complex, central Japan: an ultramafic–mafic layered intrusion in the Mikabu greenstone belt, Sambagawa metamorphic terrain
T. Agata 241
Diversity of 1.8 Ga potassic granitoids along the edge of the Archaean craton in northern Scandinavia: a result of melt formation at various depths and from various sources
B. Öhlander and T. Skiöld 265
Large-scale silicate liquid immiscibility: a possible example from northeastern Brazil
V.P. Ferreira, A.N. Sial and J.A. Whitney 285
Geochemistry and petrogenesis of the Early Cretaceous continental rift-type volcanic rocks of the Mecsek Mountains, South Hungary
S. Harangi 303
